

VACANCY

Application Support Engineer

To support continued business development, we have a vacancy for an Application Support Engineer to join the Application Engineering team.

This is a varied role working as part of the Engineering team to support our Application and Senior Application Engineers to bring projects from conception to production supply, applying the range of Kawasaki Hydraulic components and systems.

The job holder will work with other departments at KPMUK, distributors and customers to provide technical product support.

This role has good opportunities for progression within the Engineering team.

The successful applicant should have the following skills, attitude and experience:

- A positive, committed individual with a keen eye for detail.
- A practical aptitude.
- 2D and 3D CAD working knowledge.
- Good working knowledge of Microsoft software.
- Good communication skills both verbal and written.
- Preferably knowledge of the function and operation of hydraulic components.
- The ability to interpret hydraulic system circuits.
- HNC qualified Engineer.
- Hydraulics qualifications desirable.
- Full Driving licence.

If you are interested in this position, please contact HR for a full job description Applicants should apply in writing to the Human Resources & Training Department by Friday 1st April 2019.
