

## VACANCY

### Team Leader - Production

A vacancy has arisen within the Production section for a Team Leader working alternating shifts.

An example of some of the responsibilities the successful candidate will be responsible for:

- To achieve the production targets in compliance with the production plan and departmental KPI's;
- To ensure production targets and the production plan are communicated to cell leaders on a daily basis;
- To ensure the production cells within your scope of responsibility are run in accordance with the Company production engineering, quality, safety, health and environmental standards;
- Monitor compliance of regular maintenance routines;
- Identify variances to production targets, for example: quality issues, breakdowns, people performance. Take any appropriate remedial action necessary;
- To ensure a smooth transition at shift change over with the opposite shift leader;
- To ensure materials are available to work within your area of responsibility;
- Identify training needs; organise and where appropriate carry out necessary training.

A copy of the respective Team Leader job description can be acquired from HR as this will provide a full breakdown of the job role and expectation.

In addition the successful applicant must possess excellent problem solving skills, with the ability to make and take responsibility for their decisions. The successful candidate will also have excellent communication skills with the ability to communicate openly and effectively with team members and different departments within the factory in order to ensure the smooth running and furtherance of improvement activities. The ability to operate a computer is essential, SAP experience is required together with previous supervisory experience.

All applications should be submitted to the HR Department by 1.30pm on Friday 15 December 2017.
