

Vacancy

Machine Setter Operator

A permanent vacancy has arisen for a Machine Setter Operator at Kawasaki Precision Machinery (UK) Ltd.

The successful candidate will be responsible for setting and operating both conventional and CNC machines to produce precision components for our hydraulic units.

Suitable applicants would ideally have an engineering background, with experience of setting CNC Machines, be able to read technical drawings, and be familiar with using both metric and imperial measuring equipment.

We are looking for self-motivated individuals, with an eye for detail and good communication skills to join our existing team.

In addition the successful candidate will also be responsible for the following activities:

- **SAFETY:** Working with Safety as your highest priority. Ensure that all products are manufactured in accordance with the Company's Health and Safety procedures. Always immediately report any issues that raise a safety concern to your supervision and also on the Company's Hazard Reporting system.
- **QUALITY:** Machine components for Kawasaki Hydraulic Units in accordance with the relevant Standard Operating Procedures ensuring we achieve the Quality standard expected by our customers and always stop production and seek a solution when this cannot be achieved.
- **PROFITABILITY:** Achieve hourly production targets and explore all possibilities for improvement.
