

ENVIRONMENTAL POLICY STATEMENT

Kawasaki Precision Machinery (UK) Ltd is the designer and manufacturer of hydraulic equipment. Our principal activities include the machining of cast iron and steel, the assembly and testing of the hydraulic equipment, and the painting of the final product.

Although our products have a positive impact in our society, our operations have an effect on the local, regional and global environment in particular through air emissions, energy consumption and hazardous waste handling. For this reason, Senior Management is committed to operating in a sustainable manner by continually investigating improvement opportunities. In particular KPM through an Environmental Management System (EMS) will:

- Maintain compliance with the relevant environmental regulation and codes of practice and scope of the EMS as a minimum level of performance.
- Ensure that the views and requirements of any agreements made with regulators such as public authorities and other private service providers are taken into consideration and have a process of communication with the community where appropriate.
- Comply with Carbon Reduction Commitments (CRC)
- Promote sustainable waste management through minimising waste, especially hazardous waste while reusing and recycling materials where possible.
- Improve energy management, investigate recyclable energy systems and promote efficient energy consumption.
- Make all employees, contractors and all interested parties aware of our environmental policy, whilst providing suitable training to improve environmental awareness, and allocate clear responsibilities.
- Promote the integration of our EMS into all company activities so as to ensure all environmental aspects are taken into consideration at the decision making process.
- Meet the criteria of self-compliance under ISO14001 and continuous improvement
- Investigate all working practices that may cause pollution to the local and global environment taking all steps to reduce the risk and aid prevention.
